## U.S. Pear Exports Forecast to Reach a New Record in Marketing Season 2000/01

Source: U.S. Department of Commerce, Bureau of the Census

Larger supplies of good quality fresh-marketed pears and the diversion of more processing pears into the fresh market are contributing to record forecast U.S. pear exports in marketing year (MY) 2000/01. The increase in U.S. shipments reflects the expanded supply situation, which has put downward pressure on pear prices and has spurred demand from key foreign customers, including Mexico, Venezuela, and Brazil. U.S. pear exports in 2000/01 are also benefitting from improving Asian economies and continued U.S. promotion efforts. At 170,000 tons, the 2000/01 U.S. pear export forecast is 11 percent higher than shipments in 1999/2000 and 3 percent more than the 1997/98 record. Exports have become vital for the success of the U.S. pear industry. Almost 20 percent of the U.S. total pear crop is now going to export, compared to 5 percent in MY 1987/88. Mexico represents the largest export market for U.S. pears. The importance of the Mexican market for U.S. pears has grown steadily in recent years and now accounts for half of total U.S. shipments. Continued supplies of good quality fruit, strong demand from leading customers, and market promotion efforts should continue to boost U.S. pear sales in foreign markets.

## **Export Summary January 2001**

U.S. exports of horticultural products to all countries in January totaled \$814 million, an increase of 6 percent from the same month a year earlier. Categories with the most significant increases in January were essential oils (up 41 percent to \$52 million), fruit and vegetable juices (up 18 percent to \$59 million), and miscellaneous horticultural products (up 16 percent to \$155 million). The only categories with decreases were fresh fruit (down 2 percent to \$135 million) and wine and beer (down 18 percent to \$45 million).

January exports to Canada, the largest market, were up 7 percent from January 2000, to \$252 million. Exports to China were up 128 percent to \$13 million, while exports to the Philippines rose 45 percent, to \$8 million and exports to Mexico rose 21 percent to \$81 million. Exports to the EU were up 8 percent to \$154 million while exports to Japan rose 2 percent to \$124 million.

Exports for the October-January 2000/01 period were up 9 percent from the same period in 1999/2000 to \$3.83 billion. Tree nut exports are up 28 percent to \$535 million for the October-January 2000/01 period, while fresh fruit exports are up 13 percent to \$673 million, and fresh vegetable exports are up 13 percent to \$430 million. The fastest growing markets for FY 2001 to date are: China, up 122 percent; Malaysia, up 48 percent; Taiwan, up 22 percent; Hong Kong, up 21 percent; Venezuela, up 17 percent; and the EU, up 14 percent.

### **New U.S. Trade Internet System**

The public now has unlimited access to the most up-to-date data on U.S. exports and imports of agricultural, fishery, and forestry products. The U.S. Trade Internet System allows users the flexibility to customize their data searches and save their criteria for repeated use. Users can obtain value or volume data for selected harmonized codes or commodity groupings to track trends going back to 1989.

To view the site go to <http://www.fas.usda.gov/ustrade/>

For more information on the U.S. Trade Internet System, e-mail [usthelp@fas.usda.gov](mailto:usthelp@fas.usda.gov)

To access **FAS Attache Reports** on line, please go to the following Internet address:

[Http:// www.fas.usda.gov/scripts/attachrep/default.asp](http://www.fas.usda.gov/scripts/attachrep/default.asp)

Search through the country and market reports prepared by FAS attaches covering over 20 horticultural and tropical product commodities and nearly 130 countries.

### **What's New on the Homepage?**

The Horticultural and Tropical Products Division has introduced a feature on its homepage designed to bring the latest information to the public as efficiently as possible. The site contains information on policy and technical developments affecting trade in horticultural commodities, selected reports submitted by FAS overseas offices, and special reports. For further information, please contact Nancy Hirschhorn (202)720-2974. Go to <http://www.fas.usda.gov/http/>.

---

## World Pear Situation and Outlook

Pear production in selected countries in 2000/01 is forecast at 13.6 million metric tons, up 4 percent from the 1999/2000 output. Larger crops are expected in some major pear producing countries, such as China, Italy, Argentina, and South Africa. On the other hand, smaller pear crops in 2000/01 are expected in some other important producing countries, including the United States, Spain, and France. Selected countries' pear exports in 2000/01 are forecast at 1.6 million tons, 6 percent above the previous season's shipments. Higher exportable supplies are anticipated in the main exporting countries of China, the Netherlands, Italy, the United States, Argentina, and Chile. The 2000/01 U.S. pear export forecast has been revised up 10 percent to a record 170,000 tons, which is 11 percent higher than shipments in 1999/2000 and 3 percent more than the 1997/98 record. The increase in U.S. shipments mainly reflects larger supplies of good quality fresh-marketed pears and the diversion of more processing pears into the fresh market. This situation has put downward pressure on prices and has spurred demand from important customers. U.S. pear exports in 2000/01 are also benefitting from improving Asian economies and continued U.S. promotion efforts.

### Northern Hemisphere

#### Production

Pear production in selected Northern Hemisphere countries in 2000/01 is forecast at 12.2 million tons, up 3 percent from the 1999/2000 output. The increase mainly reflects a larger crop in *China*, the world's leading pear producer, and in *Italy*, the second-largest producer. On the other hand, pear production in the *United States*, the third-largest producer, is now forecast to decrease 4 percent in 2000/01 to 885,000 tons.

China's pear production is forecast to increase to more than 8 million tons in 2000/01. Pear production in China has increased steadily during the last years, as a result of extensive planting during the 1980's and early 1990's. Most of China's pear crops are grown by many individual growers on small parcels of land. Large scale commercial orchards are rare. Ya pears are the most popular variety grown in China, accounting for about 30 percent of production. Other important varieties include Su, Xuehua, and Pingguo pears.

Italian pear production, the largest in the European Union (EU), is expected to have bounced back this season from the reduced 1999/2000 crop. However, Italy's 2000/01 pear production forecast has been revised to 910,000 tons, down slightly from the December estimate, due to unfavorable weather conditions late in the season. Nonetheless, production is 16 percent more than the 1999/2000 crop. The region of Emilia-Romagna in Northern Italy continues to account for the bulk

of total Italian pear production. Abate and Williams are the two major pear varieties grown in Italy.

U.S. pear production in 2000/01 is now forecast at 885,000 tons, 3 percent below the December estimate and 4 percent less than production in 1999/2000. The downturn mainly reflects reduced production of Barlett pears, the main variety, accounting for more than half the U.S. annual pear crop. Production of U.S. Barletts in 2000/01 is now forecast at nearly 470,000 tons, down 4 percent from the December estimate and 12 percent below the 1999/2000 crop. Normally, about three-quarters of the U.S. Bartlett crop is processed. However, economic difficulties facing some processing industries in northern California continue to divert more Barletts to the fresh domestic and export markets. This situation is keeping prices lower this season and lowering returns to growers. Reportedly, pear producers in the Pacific Northwest are having the worst season in about 17 years. Washington, California, and Oregon account for more than 95 percent of the U.S. pear crop.

### **Trade**

Northern Hemisphere pear exports in 2000/01 have been revised up to a record 1 million tons, reflecting more shipments from the *United States*. Increased exports are also anticipated from *the Netherlands, Italy, and China*. Pear shipments from these 4 countries will likely account for about 65 percent of Northern Hemisphere pear shipments in 2000/01.

The Netherlands pear exports in 2000/01 are forecast at 181,000 tons, up more than 20 percent from shipments in 1999/2000. A larger pear crop, more favorable prices, and continued strong demand from major customers are boosting Dutch pear shipments this season. The United Kingdom is by far the most important destination for Dutch pears, followed by Russia, Sweden, France, and Norway. The Netherlands is also a transshipment venue for fruit trade in the EU. Almost all Chilean pears destined for the EU market are traded via the Netherlands.

The 2000/01 Italian pear export forecast has been lowered slightly to 150,000 tons. Hail storms in northern Italy late in the season affected the quality of the fruit and, as such, reduced export expectations. Germany is Italy's major pear market, accounting for about half the volume of total shipments.

China's pear exports are forecast to increase to 150,000 tons in 2000/01, mainly the result of a larger crop. Pear shipments from China have increased considerably in recent years. For example, China exported about 140,000 tons of pears in 1999/2000, compared to practically nothing 10 years ago. Fruit quality in China continues to improve contributing to the expansion of its export markets, especially to neighboring Asian countries and Russia.

The 2000/01 U.S. pear export forecast has been revised up 10 percent to a new record of 170,000 tons, which is 11 percent higher than shipments in 1999/2000 and 3 percent more than the 1997/98 existing record. The volume of U.S. pear exports during the period July 2000 to January 2001 totaled nearly 120,000 tons, up 9 percent from the same period last season. The increase in U.S. shipments mainly reflects larger supplies of good quality fresh-marketed pears and the diversion of

more processing pears into the fresh market. This situation had put downward pressure on prices and has spurred demand from important customers, including Mexico, Venezuela, and Brazil. U.S. pear exports in 2000/01 are also benefitting from improving Asian economies and continued U.S. promotion efforts.

Exports have become vital for the success of the U.S. pear industry. The completion of trade agreements and increased promotion activities under the Market Access Program (MAP) have been key elements in the success of U.S. pear exports in recent years. Almost 20 percent of the U.S. total pear crop is now going to export, compared to 5 percent in 1987/88. Canada and Mexico together account for more than three-quarters of total U.S. pear shipments. Continued supplies of good quality fruit, strong demand from leading customers, and market promotion efforts should continue to boost U.S. pear sales in foreign markets.

## **Southern Hemisphere**

### **Production**

Pear production in selected countries of the Southern Hemisphere in 2000/01 (crop harvested in early-2001) is forecast at 1.4 million tons, up 13 percent from last season's reduced output. Production recoveries are expected in the principal southern producing countries of *Argentina*, *Chile*, and *South Africa*.

Argentina's pear production, the largest in the Southern Hemisphere, in 2000/01 is forecast to bounce back to 640,000 tons, up nearly 30 percent from the 1999/2000 weather-reduced crop. More favorable climatic conditions this season have increased Argentina's pear production prospects for 2000/01. The majority of Argentina's commercial pear production is located in Rio Negro (about 75 percent). Other important pear-producing regions in Argentina include Neuquen and Mendoza, accounting each for about 12 percent of production. More than half of the Argentine pear crop is exported fresh and the remainder is consumed fresh in the domestic market, processed into juice, or canned.

Chile's 2000/01 pear crop is forecast to increase 5 percent to 249,000 tons, the result of higher yields and slightly larger harvested area. There are more than 36 pear varieties grown in Chile. The Packham's Triumph variety, grown mainly for the fresh market, accounts for about 45 percent of the Chilean pear crop. The Beurre Bosc variety makes up about 25 percent of Chile's pear production and exports.

South Africa's pear production in 2000/01 is forecast at 310,000 tons, 4 percent more than the 1999/2000 crop, due to expanded acreage coming into bearing age. Similar to last year's situation, more pears this season would likely be diverted to juice production due to the increased volume of lower quality fruit.

## Trade

Overall pear exports from selected Southern Hemisphere countries in 2000/01 are forecast at about 580,000 tons, up 7 percent from 1999/2000 shipments. Pear exports in 2000/01 are expected to increase for all the major shippers in the Southern Hemisphere, including *Argentina, Chile, and South Africa*.

Argentina's pear shipments, the largest in the Southern Hemisphere, in 2000/01 are forecast at 300,000 tons, up 11 percent from 1999/2000 shipments, based on the larger crop. Argentina's fresh pear marketing season is year round with the bulk exported February through April. Major export markets are Brazil, countries in the EU, mostly Italy, and the United States.

Pear exports from Chile, the second largest supplier in the Southern Hemisphere, are also forecast to increase in 2000/01 to 130,000 tons. A larger volume of good quality fruit is expected to improve Chile's pear shipments this season. The EU is Chile's largest export market, followed by the United States. During the last few years, sales to the Far East and Latin American markets have also shown growth.

Pear exports from South Africa, the third largest exporter in the Southern Hemisphere, are forecast to increase 3 percent in 2000/01 to 118,500 tons, the result of more exportable supplies at lower prices. Countries in the EU remain South Africa's major export markets. South Africa's pear exports to the Middle East are also strong, with a 90-percent market share in the region.

South Africa, Australia, the United Kingdom, Uruguay, Argentina, Chile, France, New Zealand, the Netherlands, Germany, Belgium, Spain, Italy, and Brazil formally launched the World Apple and Pear Association on January 1, 2001. The purpose of the association is to address concerns among the industries, such as the imbalances between demand and supply, variety adjustment, the prevailing low price situation, and the increased role of food safety and standardization in food trade.

*(The FAS Attache Report search engine contains reports on the Deciduous Fruit industries for more than 20 countries, including China, Italy, and France. For further information on production and trade, contact Samuel Rosa at 202-720-6086. For information on marketing, contact Sonia Jimenez at 202-720-0898. ## Japan Considers Safeguard Measures on Imported Vegetables Could Impact Trade from China and Other Key Suppliers

**Rising Vegetable Imports Stir Concern:** According to recent trade data, Japan's imports of vegetable products in calendar year (CY) 2000 were valued at \$2.03 billion, down slightly from the record import level established in 1999. During this period, China accounted for \$1.09 billion (54 percent) of Japan's total vegetable product imports, up 2 percent from 1999. Japan's imports of vegetables from the United States, the second largest supplier, were valued at \$170 million in CY 2000, down 6 percent from the previous year. Imports of vegetables from New Zealand, the third supplier, were valued at \$122 million, up 3 percent from 1999, according to World Trade Atlas data.

In response to rising imports and pressure from the Japanese food industry, Japan's Ministry of Agriculture, Forestry, and Fisheries (MAFF) has implemented preliminary safeguard investigations on imported vegetables. These measures could eventually result in restrictions on imports of certain vegetables and other agricultural products.

**Japan Implements Formal Safeguard Actions:** On December 22, 2000, Japan reported to the World Trade Organization (WTO) in Geneva, Switzerland, that it had begun a formal investigation of its market for fresh shiitake

mushrooms, welsh onions, and tatami mats. The investigation is to be performed by a panel of government agencies comprising MAFF, the Ministry of Economics, Trade, and Industry (METI), and the Ministry of Finance (MOF), to determine whether rising levels of imports seriously injure Japan's domestic food industry. The results of this investigation are expected by the end of April. It is then expected to take several more months to make a final determination on whether safeguard measures, such as a temporary increase in tariff rates or the imposition of import quotas, should be implemented.

In late January 2001, MAFF announced that it would also begin a preliminary safeguard investigation on the following products: garlic, eggplant, wakame, seaweed, eel, bonito, dried

Total Value: \$1.95 Billion

Source: World Trade Atlas

shiitake mushrooms, and plywood. While no schedule has been announced for these investigations, the following products were put on an emergency fast track basis: shiitake mushrooms, tomatoes, colored peppers, onions, sawn lumber, and laminated lumber. In part, these investigations reflect Japanese unease with their merchandise trade deficit with China, which reached \$24.8 billion in CY 2000.

The Japanese trade industry has voiced concern over the need for possible safeguard measures. Japan's food service and processing industries could suffer serious damage if the market prices of imported vegetables increased sharply due to possible safeguard measures.

If a safeguard measure is introduced, it would affect all suppliers, not just China, or South Korea (responsible for surging imports of tomatoes and colored peppers). A safeguard action could have a negative impact on U.S. exports of onions and tomatoes to Japan, which combined were valued at \$35 million in CY 2000. Both items were targeted for preliminary surveillance. Imported onions accounted for an estimated 15 percent of Japan's onion

Source: World Trade Atlas

consumption in CY 2000.

According to trade reports, China's Ministry of Foreign Trade and Economic Cooperation denies allegations of any possible vegetable dumping in Japan. The Ministry claims that the production

costs of China's vegetables are much lower than the prices of those vegetables exported to Japan. Increased imports in recent years have given China a significant share (upwards of 40 percent) of Japan's vegetable market, putting pressure on the local farm produce prices.

**Changing Times in Japan's Vegetable Market:** According to the U.S. Agricultural Minister-Counselor's Office in Tokyo, vegetable production in Japan had been declining even before the rise in Chinese vegetable shipments, as most Japanese vegetable farmers are elderly and it takes about 3 times as much labor to produce vegetables as it does other products, such as rice. The declines are primarily in heavy, low-value, labor-intensive vegetables such as cabbage. In 1999, vegetable production totaled 13.9 million tons (valued at \$18.4 billion), up from 13.6 million tons in 1998, but down from 14.3 million tons in 1997 and 14.6 million tons in 1996. While cabbage, daikon raddish, and potatoes are down, items showing growth recently include tomatoes, strawberries, lettuce and specialty items.

Japanese supermarkets have been experimenting with vegetable production in China for about 8 to 10 years, but it is only in the past two years that Chinese quality has been good enough to allow large scale sales to Japan. For example, Chinese producers are now using Japanese seeds and other Japanese technology to improve their skills in vegetable production. Consequently, Chinese vegetables are now reportedly almost indistinguishable from Japanese vegetables. Other market factors: It only takes 16 hours for vegetables to get from Qingdao, China to Kobe, Japan by ship. The landed price for most vegetables is about half of the Japanese price. During a recent visit to a local supermarket by the U.S. Agricultural Minister-Counselor's office, it was observed that Chinese broccoli was selling for \$.90 per piece, compared to the local broccoli price of \$1.80 per piece.

*(Prepared by Emanuel McNeil and Mathew Gerard. For information on vegetable production and trade, contact Emanuel McNeil at 202-720-2083.)*

## **Organic Updates**

### **New Zealand Organics Enjoying Rapid Growth**

New Zealand's organics industry has reportedly grown significantly over the past ten years, with exports up from \$473,000 in 1990 to over \$25.8 million in 2000. With the current rate of growth, it is predicted that New Zealand organic exports could be worth more than \$215 million by 2005. A key issue facing the New Zealand organics industry is demand outpacing supply. Officials note that many of New Zealand's largest producers can easily sell everything they produce either domestically or through exports. The Government of New Zealand is encouraging more people to enter the industry by providing enterprise awards to companies working towards organic certification.

### **Organic Wines now Available at France's Largest Supermarket Chain**

After organic meat, fish, and fruits and vegetables, Carrefour, France's largest supermarket, and number two in the world after Wal-mart, is now selling organic wines. During the International Agricultural Show (SIAL), Carrefour signed a partnership with French organic wine growers. AOC organic Cotes de Provence will be sold at \$3, Anjou at \$4 and table wines at \$2.50. That organic wines are getting such unprecedented exposure shows two things: even the most sacred of products can be sold in a relatively new format, and anything organic is thought to attract consumer interest, given the recent food scares.

## **World Trade Situation and Policy Updates**

### **Argentina Agrees to Expand U.S. Citrus and Stone Fruit Market Access**

As follow-up to a verbal agreement between former Secretary Glickman and Argentine Agriculture Secretary Berhongaray to resolve several long standing market access issues, bilateral technical consultations were held in Argentina, March 6-7. Argentina committed to changing its agriculture legislation within three months (by the end of May), so that the current impediments to the entry of California citrus would be removed. Argentina finally accepted the widely used "Caribbean fruit fly protocol" as providing adequate safeguards for the export of Florida citrus, and agreed to change the entry requirements within six weeks. Argentina also agreed to administratively amend the requirements for California stone fruit within a month to improve the access for peaches and nectarines. The estimated market potential could reach as high as \$3 million for U.S. citrus and \$5 million for U.S. stone fruit.

### **Japan Food Service Wholesaler Demonstrates American Foods' Allure in Western Japan**

In two highly visible food wholesale exhibitions in Western Japan, sponsored by the Toho Food Service Wholesale Corporation, ATO/Osaka helped introduce 86 American food products to more than 4,000 restaurant industry buyers and chief decision makers. ATO/Osaka managed a USA Food Pavilion and recruited nine importer/agents which displayed and sampled products such as frozen fruits and vegetables, frozen soups, frozen seafood, Tex-Mex food ingredients, pasta, cranberry and citrus juices. The U.S. products featured in the USA Pavilion were listed in Toho's product list as "New Items" and attracted much attention. American company exhibitors are currently following-up inquiries and orders received during the show.

### **FAO Convened Committee on Agriculture**

From March 26-30, the UN Food and Agriculture Organization (FAO) convened its Committee on Agriculture to discuss FAO's program of work in the food and agriculture sector, including activities related to climate variability and change; reducing agricultural vulnerability to storm-related disasters; the place of agriculture in sustainable development; and biosecurity for food and agriculture. FAS/International Cooperation and Development (ICD) led the U.S. Delegation.

### **FAO Convening Interim Commission on Phytosanitary Measures (ICPM)**

From April 2-6, FAO members will meet in Rome to consider adoption of five new phytosanitary standards, and to establish ICPM's 2001-02 program of work. The revised 1997 text of the

International Plant Protection Convention (IPPC) established the Commission of Phytosanitary Measures to oversee implementation of the Convention, which promotes international cooperation to prevent the spread of plant pests, including appropriate measures for their control. The Deputy Administrator of the Animal and Plant Health Inspection Service (APHIS), Richard Dunkle, will lead the U.S. Delegation.

### **United States Exports Record Level of Almonds to India**

U.S. almond exports to India, now the industry's second largest market after Germany, reached a record level of \$70.5 million in CY 2000, up 76 percent from the previous year. Almonds were the leading U.S. agricultural export item to India last year, accounting for over 30 percent of the cumulative export value. Increasing living standards and the expanding number of middle-class consumers have contributed to the substantial increase in shipments. Almonds are very much a part of the cultural eating patterns of consumers in India. The main consumption use of almonds is as a food ingredient, rather than a snack. India sources most of its almonds (approximately 95 percent) from the United States. Through continued market development efforts, and with further liberalization of India's high import duties and tax structure, industry sources believe that U.S. almond exports to India have the potential to top \$100 million per year.

### **ATO's First Virtual Wine Tasting a Big Success**

The Wine Tasting targeted Mexico City's five star hotel and restaurant industry (HRI), with nearly \$70,000 in sales reported for the 12-month period following the event. The ATO worked closely with the California Office of Trade and Investment to identify and recruit those Mexican wine importers/distributors interested in promoting U.S. wines. Four Mexican distributors representing seven different U.S. wineries participated in the event. The winery owners/head vintners in the United States led the tasting via video teleconference, providing background information on their respective wines and the wineries, while their distributors, on-location at the video teleconference site in Mexico City, actually poured the wines, provided wine notes, answered technical questions, and took orders.

### **APHIS Begins Phytosanitary Training in Ghana**

This month, through an FAS/ICD-administered, U.S. Agency for International Development (USAID)-funded project, APHIS will begin training phytosanitary inspectors from Ghana's Ministry of Food and Agriculture Plant Protection, Regulatory Services Directorate. The training will include study tours to airports, seaports, land border ports, and APHIS plant protection and quarantine facilities to cover phytosanitary certification requirements, import permit and inspection procedures, fumigation/other treatments, pest identification, and framework protocols. The training

is a result of a February visit to Ghana by FAS, APHIS, and AMS specialists to conduct a grades, standards, and market information assessment.

### **USDA Grants Protection to 28 New Plant Varieties**

The U.S. Department of Agriculture has issued certificates of protection to developers of 28 new varieties of seed-reproduced plants. The protected seeds include corn, lettuce, pea, soybean, and watermelon. The new certificates are being issued under the Plant Variety Protection Act (PVPA). The certificates require that the varieties be new, distinct, uniform, and stable. The owners will have the exclusive right to reproduce, sell, import, and export their products in the United States for the duration of protection. USDA's Agricultural Marketing Service (AMS) administers the PVPA, which provides limited time marketing protection to developers of new and distinct seed-reproduced and tuber-propagated plants ranging from farm crops to flowers. (For additional information about the PVPA, contact AMS at 301-504-5518.)

### **USDA Issues Referendum Order on Proposed Amendments to Washington Sweet Cherry Marketing Order**

The U.S. Department of Agriculture has issued a referendum order on proposed amendments to the federal marketing agreement and order for sweet cherries grown in designated counties in Washington State. USDA will conduct the referendum April 10-27, 2001, to determine support for the amendments. Ballot material will be mailed to all known sweet cherry growers in the order's production area, including the additional counties proposed for inclusion. If the referendum is approved, it would increase the marketing order's authority by expanding its production area to include all counties in Washington State east of the Cascade Mountain Range. Other proposed amendments would: (1) increase representation on the committee; (2) allow cherries to be shipped outside the production area for handling; (3) authorize collection of late payment charges and/or interest on handlers' late payments of assessments; (4) add authority to establish container marking requirements; (5) and simplify the form filing process for committee members and alternates seeking committee positions. (For additional information, contact Kathleen M. Finn at 202-720-2491)

### **Independent Panel Completes Biotechnology Report for the EPA**

A panel of independent scientists convened by the Environmental Protection Agency (EPA) has completed its report which provides input on EPA's preliminary comprehensive reassessment of all *Bacillus thuringiensis* (Bt) corn, cotton, and potato plant incorporated protectants. EPA solicited advice from the Scientific Advisory Panel (SAP) during a public meeting held October 18-20, 2000, to ensure that the Agency's reassessment of currently-registered biotechnology products utilizes the most current scientific understanding, and meets the most stringent public health and environmental

safety standards. These protectants are regulated by EPA as pesticides because they have been engineered to contain Bt, a naturally-occurring substance which acts to combat insect pests. EPA's next step is to proceed with its comprehensive evaluation of the existing Bt registrations, taking into account all data available to the Agency, the SAP's recommendations, any newly submitted information and public comments. EPA will then publish the revised reassessment for public comment, which will include proposed registration decisions on the Bt products. (For additional information, contact David Deegan 202-564-7839 or [deegan.dave@epa.gov](mailto:deegan.dave@epa.gov).)

### **Winery Finds Success in Malaysia**

Ironstone Winery of Murphy's, California recently hosted two Winemaker's Dinners in Kuala Lumpur. The events, which were attended by more than 200 people, highlighted Ironstone's popular Obsession wine and their library collection. Organized by their distributor, Harrison's Trading, and cosponsored by the U.S. Meat Export Federation (USMEF), Ironstone provided their in-house chef to showcase U.S. beef on the menu. The Ironstone representative informed the Agricultural Attaché in Kuala Lumpur that the market for Ironstone wines in Malaysia grew from zero barely a year ago, to more than 5,000 cases today, making it one of the largest markets in Asia for Ironstone wines, and certainly the fastest growing. The combination of a good product and the right distributor has led to this success, according to Ironstone. The Office of the Agricultural Attaché introduced Ironstone to Harrison's Trading.

### **Mexico's 2001 Tariff Rate Quota for U.S. Potato Products Fills**

Mexico's Secretariat of Economy (SECO) has announced that the 2001 NAFTA tariff-rate quota (TRQ) for potato products (frozen, prepared/preserved, and fries – H.S. 2004.10.01) has been filled. As a result, beginning March 6, and for the remainder of the year, imports of these products from the United States will be subject to the 20-percent tariff authorized under NAFTA. The in-quota tariff is 4 percent and the TRQ in effect for the current year is 3,813 tons. The TRQ for CY 2000 was 3,702 tons and was filled by April 5, one month later than this year. The U.S. potato industry has requested U.S. trade negotiators and Congress to press vigorously for the early elimination of Mexico's NAFTA TRQ and out-of-quota tariff for these products. According to Census Bureau data, U.S. potato fry exports to Mexico in CY 2000 totaled 31,200 metric tons, valued at \$22 million, up 20 percent in volume and 22 percent in value from the previous year.

## **Export News and Opportunities**

Horticultural exporters, do not overlook the billions of dollars available to help facilitate sales to buyers in countries where credit is necessary to maintain or increase U.S. sales but where financing may not be available without credit guarantees. Invest the time to learn more about the Export Credit Guarantee Program (GSM-102) and Supplier Credit Guarantee Program (SCGP) to increase your sales and lower your risks. Use GSM and SCGP to avoid possible importer and importer's bank defaults on payments and ensure that American farm and food products continue to move to markets around the world. USDA does not provide financing, but it guarantees payments due to U.S. exporters in case the foreign banks or importers default.

You may learn more about GSM-102 and SCGP regulations, country specific press releases and program announcements, and a Monthly Summary of Export Credit Guarantee Program Activity on the Internet at:

**<http://www.fas.usda.gov/export.html>**

### **GSM-102**

The GSM-102 program makes available credit guarantees for sales of U.S. agricultural commodities overseas. USDA does not provide financing, but guarantees payments due from foreign banks. USDA typically guarantees 98 percent of the principal and a portion of the interest. The GSM-102 program covers credit terms from 90 days to 3 years.

Under the program, once a firm sale exists, the qualified U.S. exporter applies for a payment guarantee before the date of export. The U.S. exporter pays a fee calculated on the dollar amount guaranteed, based on a schedule of rates applicable to different lengths of credit periods. The Commodity Credit Corporation (CCC)-approved foreign bank issues a dollar-denominated, irrevocable letter of credit in favor of the U.S. exporter, ordinarily advised or confirmed by the financial institution in the United States agreeing to extend credit to the foreign bank. The U.S. exporter may negotiate an arrangement to be paid as exports occur by assigning the U.S. financial institution the right to proceeds that may become payable under the guarantee, and later presenting required documents to that financial institution. Such documents normally include a copy of the export report. If a foreign bank fails to make any payment as agreed, the exporter or the assignee may file a claim with USDA for the amount due and covered by the guarantee. USDA will pay the U.S. bank and will take on the responsibility of collecting the overdue amount from the foreign bank.

## Supplier Credit Guarantee Program

Since the last publication, USDA authorized \$5 million in supplier credit guarantees for sales of U.S. agricultural commodities to Macedonia under the SCGP for fiscal year 2001. Exporters may apply for credit guarantees on a first-come, first-served basis to cover sales of commodities.

The SCGP is unique because it covers short-term financing extended directly by U.S. exporters to foreign buyers and requires that the importers sign a promissory note in case of default on the CCC-backed payment guarantee. The SCGP emphasizes high-value and value-added products, but may include commodities or products that also have been programmed under the GSM-102 program.

The SCGP encourages exports to buyers in countries where credit is necessary to maintain or increase U.S. sales but where financing may not be available without CCC guarantees. Under the SCGP, CCC guarantees a portion of payments due from importers under short-term financing (up to 180 days) that exporters have extended directly to the importers for the purchase of U.S. agricultural commodities and products. These direct credits must be secured by promissory notes signed by the importers. CCC does not provide financing but guarantees payment due from the importer.

## GSM-102 and SCGP

The following tables present the FY 2001 GSM-102 and SCCP for which USDA has allocated credit guarantees for sales of U.S. horticultural products. For most countries and regions, exporters may apply for credit guarantees on a first-come-first-served basis to cover sales of any of the eligible commodities published in FAS program announcement PR 0002-01, issued January 10, 2001 or as superseded. The following horticultural products are eligible under the export credit guarantee programs: dried fruit; fresh fruit; frozen fruit; canned fruit; 100-percent fruit juices; fruit and vegetable concentrates, pastes, pulps and purees; honey; hops or hops extract; beer; tree nuts; fresh vegetables; canned vegetables; dried vegetables; wine; and brandy. The General Sales Manager will consider requests to establish an SCGP and/or GSM Program for a country or region or amend an authorized program to include horticultural commodities and products that are currently not eligible.

*(For further information on the SCGP or GSM-102 Program for horticultural commodities, contact Yvette Wedderburn Bomersheim on 202-720-0911).*

## ALL SALES ARE FINAL

NTIS electronically stores our collection of almost 3 million items and custom-reproduces a single copy specifically for your order. Therefore, NTIS does not accept cancellations, requests for modifications, or returns for credit or refund. All sales are final. If you believe the item you received is defective or if we made an error in filling your order, please contact our Subscriptions Department via e-mail at [subscriptions@ntis.gov](mailto:subscriptions@ntis.gov) or by phone at 1-800-363-2068 or (703)605-6060.

## SINGLE COPIES

To order, call NTIS Sales Desk 1-800-553-NTIS (6847) or (703) 605-6000; fax to (703) 605- 6900; or E-mail to: [orders@ntis.gov](mailto:orders@ntis.gov).

For single copies, add \$5 handling fee per total order for U.S., Canada, Mexico; \$10 per total order for all other countries. RUSH service is available for an additional fee; please call the NTIS Sales Desk for details.

*Thank you for your order!*

# FOREIGN AGRICULTURAL SERVICE PUBLICATIONS

The publications listed below present timely and reliable information on U.S. and world production, supply and demand, and trade for many different commodities. All these publications can be subscribed to through the National Technical Information Service (NTIS) of the U.S. Department of Commerce. To order, call NTIS at 1-800-363-2068, (703) 605-6060, or (703) 487-4639 for TDD (hearing impaired only). A subscription form is provided on the reverse side.

## ***AgExporter Magazine***

Monthly magazine for businesses selling farm products overseas provides tips on exporting, descriptions of markets with the greatest sales potential, and information on export assistance available from the U.S. Department of Agriculture. The audience is U.S. agricultural producers, exporters, trade organizations, state departments of agriculture, and any other export-oriented organization.

## ***Cotton: World Markets and Trade***

Monthly report provides statistics and other information on U.S. and world production, supply and demand, and trade for cotton. Covers crop conditions, the latest trade policy developments, and export market information.

## ***Dairy Monthly Imports***

Monthly report of imports of cheese and other quota dairy products subject to licensing, as well as imports under the quota not subject to licensing.

## ***Dairy: World Markets and Trade***

Semi-annual publication provides information on U.S. and world production, use and trade of dairy products, trade policy developments, and export market information.

## ***Grain: World Markets and Trade***

Monthly publication provides information on U.S. and world production, supply and demand, and trade for a variety of grains. Covers crop estimates, the latest trade policy developments, and export market information.

## ***Livestock and Poultry: World Markets and Trade***

Semi-annual publication provides information on U.S. and world production, use and trade of livestock and poultry products, trade policy developments, and export market information.

## ***Monthly Summary of Export***

### ***Credit Guarantee Program Activity***

Monthly summary report shows fiscal year commitment figures for the Commodity Credit Corporation's Export Credit Guarantee Program (GSM-102) and Intermediate Credit Guarantee Program (GSM-103).

## ***Oilseeds: World Markets and Trade***

Monthly publication provides data and analyses on U.S. and world production, supply, use, and trade of a variety of oilseeds and products. Covers production estimates, latest trade policy, commodity prices, and export market information.

## ***Sugar: World Markets and Trade***

Semi-annual publication provides information on the world production and supply and demand situation for sugar. Includes in-depth special country features.

## ***Tobacco: World Markets and Trade***

Quarterly report provides information on U.S. and world production, supply and demand, and trade for tobacco. Covers crop estimates, the latest trade policy developments, and export market information. The March issue contains complete U.S. tobacco trade data for the preceding calendar year.

## ***Tropical Products: World Markets and Trade***

Issued four times a year. Provides information on the world production and supply and demand situation for coffee and tea. Presents U.S. trade data on spices and essential oils.

## ***U.S. Export Sales***

Weekly report based on reports submitted by private exporters. Outstanding export sales as reported and compiled with other data give a snapshot view of the current contracting scene. All countries with outstanding sales or accumulated exports are included for each class of wheat, all wheat, wheat products, corn, soybeans, soybean cake and meal, American pima cotton, all upland cotton, whole cattle hides, and wet blues.

## ***Wood Products:***

### ***International Trade and Foreign Markets***

Issued five times a year. Provides information on the production, trade, and supply and demand situation in countries around the world for wood products. Highlights the latest trade policy developments, export statistics, and market information of interest to U.S. exporters.

## ***World Agricultural Production***

Monthly report provides information on U.S. and world production of major agricultural products, including crop, weather and production briefs, and special articles of interest to the trade.

## ***World Horticultural Trade and U.S. Export Opportunities***

Monthly publication provides information on the world situation and outlook for horticultural products. Covers export competition, foreign market import potential, and export opportunities for U.S. horticultural products.

contact us at the address shown above.

Summaries and selected tables from many Foreign Agricultural Service world market and trade reports are available electronically. The reports include U.S. Export Sales (available electronically after 8:30 a.m. on release day); Grain: World Markets and Trade; Oilseeds: World Markets and Trade; Cotton: World Markets and Trade; Tobacco: World Markets and Trade; World Agricultural Production; the early release version of World Horticultural Products and U.S. Export Opportunities; and Tropical Products: World Markets and Trade (all available electronically after 3:00 p.m. Washington DC time on release day) as well as Sugar: World Markets and Trade; Livestock and Poultry: World Markets and Trade; Dairy: World Markets and Trade, and U.S. Planting Seed Trade (available within a week after release.)

You can read the reports on the FAS home page (<http://www.fas.usda.gov>). The reports remain "current" until the succeeding issue is available. Older issues are available in the archives section of the home page. We also make selected cover articles and graphics available from these publications, in a separate section of the site. Reports are also available from the Economic Bulletin Board at Stat-USA, on the same schedule. For more information, you may contact Stat-USA at (202) 482-1986 (Monday-Friday, 8:30-5:30 p.m. Washington, DC time.)

For more information on the FAS home page, contact Glenn Kaup, tel. (202) 720-3329; fax. (202) 720-3229; or via e-mail [kaup@fas.usda.gov](mailto:kaup@fas.usda.gov)

*The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).*

*To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer."*
